

## C Lists

Get the files from [http://www.lsv.ens-cachan.fr/~schmitz/teach/2012\\_prog/part1/td2\\_c/](http://www.lsv.ens-cachan.fr/~schmitz/teach/2012_prog/part1/td2_c/). Besides the exercises in Jean Goubault-Larrecq's lecture notes 'programmation\_lecon2.pdf' you will find three C files `list.h`, `list.c`, and `test.c` and a `Makefile`. The header file declares a 'list' type and several functions acting on lists, inspired by the `List` module of OCaml. Your job is to implement these functions in `list.c`.
